Maximize the impact of your biomedical research and get your paper published faster by verifying the bioinformatics before submission

Unicle bioinformatics services | Pre-submission research paper review

At a glance

Incorporating convincing statistics and bioinformatics is a challenging task but required to publish your work in the best journals. Unicle experts help to evaluate your work before submission and support to formulate rebuttal letters to satisfy bioinformatics reviewers.

2 days full focus
Our experts need two days to review and provide concrete improvements for your paper

5-day turn-around
Time matters when submitting your paper. We deliver feedback in time

Expertise on call
Leverage our bioinformatics expertise and experience with publishing high-impact papers

Increase success
Maximize your change to get your research published in high-impact journals

Challenges

Peer review is an essential component of publishing research papers. To enhance the evaluation process, many top journals now incorporate statistics and bioinformatics experts among their selected reviewers. Authors therefore need to justify their research design and ensure that their research methodology aligns with statistical and computational best practices in a manner that satisfies the rigorous standards of bioinformatics expert reviewers. This can be a challenging task.

Solutions

Unicle provides a paper review service that provides authors with methodological guidance, ensuring that research design, data collection, and statistical analyses adhere to best practices and standards. Our bioinformatics experts lend their proficiency in interpreting statistical and bioinformatics results, elucidating implications, and contextualizing findings. Our service is tailored to elevate credibility and trustworthiness of your work and to enhance the impact and dissemination potential of your work in reputable journals and the broader scientific community.

Leverage experts who have collectively published 150+ papers

Short turn-around-time to keep momentum and meet deadlines

Ability to quickly validate or create additional analysis via the UniApp

Benefits

- Maximize the chances of publishing your paper in a high-impact journal
- Increase the chances that your work is well received and trusted by the research community
- Get your paper published faster, by anticipation and avoiding of potential review comments before submission
